OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

Ms Alice Walker
WinField Solutions
P O Box 64589
St Paul, MN 55164-0589

DEC - 5 2012

Subject MCPA Amine
EPA Registration Number 1381-104
Application dated August 24, 2012
Resubmission by email dated November 7, 2012
Addition of MCPA PBI instructions

Dear Ms Walker

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable

A stamped copy of your label is enclosed for your records. This label supersedes all previously accepted labels. You must submit one (1) copy of the final printed label before you release the product for shipment. Products released for shipment after eighteen (18) months from the date of this letter must bear the new revised label. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA §6(e). Your release for shipment of the product constitutes acceptance of these conditions.

If you have any questions, please contact Hope Johnson at 703-305-5410

Sincerely,

A handwritten signature in black ink, appearing to read "Kathryn V. Montague".

Kathryn Montague
Product Manager 23
Herbicide Branch
Registration Division (7505P)

RECEIVED
DEC - 5 2012
Methylamine salt of 2-methyl-4-chlorophenoxyacetic acid
1381-104

MCPA Amine

ACTIVE INGREDIENT

Dimethylamine salt of 2-methyl-4-chlorophenoxyacetic acid

48.72%

INERT INGREDIENTS

Total

51.28%

100.00%

Equivalent to 39.72% 2-methyl-4-chlorophenoxyacetic acid Contains 3.70 lbs of MCPA acid per gallon

Isomer specific by AOAC Method No. 6 A18-22 (13th Edition)

KEEP OUT OF REACH OF CHILDREN

DANGER PELIGRO

Si usted no entiende la etiqueta busque a alguien para que se la explique a usted en detalle
(If you do not understand the label find someone to explain it to you in detail)

FIRST AID

IF IN EYES Hold eyelids open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present after the first 5 minutes then continue rinsing. Call a poison control center or doctor for treatment advice.
IF SWALLOWED Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED Move person to fresh air. If person is not breathing call 911 or an ambulance then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

Note to Physician Probable mucosal damage may contraindicate the use of gastric lavage. Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information in case of emergency call toll free 1-877-424-7452.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. Corrosive. Causes irreversible eye damage. Wear protective eyewear (goggles, face shield, safety glasses). Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or clothing. Avoid contact with skin or clothing. Avoid breathing spray mist. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

Personal Protective Equipment (PPE)

Some materials that are chemical-resistant to this product are any waterproof material. If you want more options follow the instructions for category A on an EPA chemical resistance category selection chart.

Mixers, loaders, applicators, flaggers, and other handlers must wear:

- Long-sleeved shirt and long pants
- Chemical resistant gloves for category A
- Shoes plus socks and
- Protective eyewear (goggles, face shield, safety glasses)

WINFIELD

AgriSOLUTIONS

Additional PPE requirements for mixers and loaders supporting aerial application to rangelands pasture lands or noncropland These mixers/loaders also must wear

- A chemical resistant apron and
- A NIOSH-approved particulate filtering respirator equipped with any N R or P class filter media with NIOSH-approval number prefix TC 84A It is recommended that the respirator wearer be fit tested and trained in the use maintenance and limitations of the respirator

See Engineering Controls for additional requirements

Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product s concentrate Do not reuse them Follow manufacturer s instructions for cleaning or maintaining PPE If no such instructions for washables exist use detergent and hot water Keep and wash PPE separately from other laundry After each day of use clothing or PPE must not be reused until it has been cleaned

Engineering controls statement

When handlers use closed systems enclosed cabs or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170 240 (d) (4-6)] the handler PPE requirements may be reduced or modified as specified in the WPS Pilots must use an enclosed cockpit that meets the requirements listed in the WPS for agricultural pesticides [40 CFR 170 240(d)(6)]

USER SAFETY RECOMMENDATIONS

Users should

- Wash hands before eating drinking chewing gum using tobacco or using the toilet
- Remove clothing/PPE immediately if pesticide gets inside Then wash thoroughly and put on clean clothing
- Remove PPE immediately after handling this product Wash the outside of gloves before removing As soon as possible wash thoroughly and change into clean clothing

ENVIRONMENTAL HAZARDS

Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark Do not contaminate water when disposing of equipment washwater or rinsate Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated area Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours

This chemical has properties and characteristics associated with chemicals detected in groundwater The use of this chemical in areas where soils are permeable particularly where the water table is shallow may result in groundwater contamination

Most cases of groundwater contamination involving phenoxy herbicides such as MCPA AMINE have been associated with mixing/loading and disposal sites Caution should be exercised when handling MCPA AMINE pesticides at such sites to prevent contamination of groundwater supplies Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills Placement of mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination

Use care to avoid spray contact or drift to susceptible plants such as beans and other legumes cotton flowers grapes ornamental vegetables and other plants Do not permit spray mist containing this product to drift onto them since even very small quantities of the spray which may not be visible can cause severe injury during both growing and dormant periods

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling Do not apply this product in a way that will contact workers or other persons either directly or through drift Only protected handlers may be in the area during application For any requirements specific to your State or Tribe consult the agency responsible for pesticide regulation

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements of this box apply only to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls
- Chemical resistant gloves made of any waterproof material
- Shoes plus socks, and
- Protective eyewear

NON AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment areas until spray has dried.

ANNUAL AND BIENNIAL WEEDS

Beggarticks, bull thistle, burdock (common), burhead, cocklebur, *goatsbeard, *hempnettle, jimsonweed, kochia, *ladysthumb, lambsquarter, *marshelder, mustards (except blue), pennycress (fanweed), pepperweed (field), pigweed (tumble, prostrate, smooth), poison hemlock, prickly lettuce, *puncturevine, ragweed (common, giant), redstem, *shepherdspurse, sicklepod, stinkweed, *sunflower, *velvetleaf, Venice mallow, *wild carrot, wild radish, witchweed.

PERENNIAL WEEDS*

Arrowhead, bulrush, bindweed (hedge, field), buttercup (corn, creeping, hairy), Canada thistle, curly indigo, dandelion, dragonhead, mint, **hempnettle, hoary cress (white top), honeysuckle, plantain, rush (soft), smartweed, **Texas blueweed, water plantain, **whitebrush, wild garlic, wild sage (Sonoma), **wild onion, yellow rocket.

* Use the higher rate for control. Repeat treatments may be necessary. Refer to specific crop Restrictions and Limitations.

** Regrowth may occur after repeat application.

FOR AERIAL APPLICATION Unless noted otherwise under individual **DIRECTIONS** section, for aerial application, apply the specified amount in a minimum of 2 gallons of water per acre.

FOR GROUND APPLICATION Apply the specified amount in a minimum of 10 gallons of water per acre. Use more water for both methods when adverse growing conditions are present.

DO NOT apply with high spray pressures, hollow cone, or other nozzle types that produce small spray droplets which may drift. Avoid spray drift by making applications when conditions such as wind, air stability, and temperature inversions are not a factor. The use of a suitable drift control agent at the proper rate will aid in the reduction of spray drift. Do not apply this product through any type of irrigation system.

PLANTBACK INTERVAL

Wheat, barley, oats, rye, flax, and peas treated with MCPA may be replanted with any crop specified on an MCPA label or any crop for which a residue tolerance exists for MCPA. For crops not listed on an MCPA label or on crops for which no residue tolerances for MCPA have been established, a 1-year plantback interval must be observed.

SPRAY DRIFT MANAGEMENT

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment and weather-related factors determines the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions.

Apply only as a medium or coarser spray (ASAE standard 572) or a volume mean diameter of 300 microns or greater for spinning atomizer nozzles

Apply only when the wind speed is 2-10 mph at the application site

Additional requirements for aerial application

The boom length must not exceed 75% of the wingspan or 90% of the rotor blade diameter

Release spray at the lowest height consistent with efficacy and flight safety Do not release spray at a height greater than 10 feet above the crop canopy

When applications are made with a crosswind the swath will be displaced downwind The applicator must compensate for this displacement at the downwind edge of the application area by adjusting the path of the aircraft upwind

Do not make applications into temperature inversions

Additional requirements for ground boom application

Do not apply with a nozzle height greater than 4 feet above the crop canopy

MIXING INSTRUCTIONS

WATER BASED SPRAY - Fill the equipment half full of water agitate while adding this product then add the rest of the water

NITROGEN FERTILIZER Weed and feed applications for small grains grasses grown for seed or grass pastures according to label use rates Add half the fertilizer to the tank then add ½ to ¾ pint of **MCPA AMINE** per acre Agitate constantly and vigorously and finish filling the spray tank with fertilizer Apply as soon as possible agitating constantly Do not hold spray mixture overnight If incompatibility is a problem the use of **COMPLETE COMPATIBILITY®** agent at the specified label rate may correct the problem Fertilize according to the recommendations of **Agn Source™** labs your supplier or your Extension specialist

Herbicide foliage contact burning may occur as a result of fertilizer use Lower use rates and concentrations will reduce this problem

Wash spray equipment thoroughly with **PROTANK®** cleaner after using this product When cleaning equipment do not pour washwater on the ground spray or drain over a large area away from wells or other water sources

Note When stored at temperatures below freezing it may be necessary to warm contents to 70° F and mix thoroughly before using

SPRING PLANTED SMALL GRAINS - Oats Barley Rye and Wheat Not Underseeded With Legumes

WEEDS	Amount of MCPA AMINE Per Acre	DIRECTIONS
Annual weeds	½ pint	Apply when weeds are small
Annual and biennial weeds	1 to 1-5/8 pints*	Apply to grain at 3 to 5 leaf stage or up to early boot stage (Zadoks 1 ₃ to 4 ₀) Do not apply during boot to dough stage (Zadoks 4 ₀ to 8 ₃)
Perennial weeds	1½ to 1 5/8 pints*	

FALL PLANTED SMALL GRAINS - Oats Barley Rye and Wheat Not Underseeded With Legumes

Annual and biennial broadleaf weeds	½ pint	Apply in early spring when weeds are small and grain is fully tillered but before boot stage (Zadoks 2 ₅ to 4 ₀)
Perennial weeds	½ to 1 pint*	

RESCUE TREATMENT Wheat

Perennial broadleaf weeds	1-5/8 pints**	For weed suppression treat in spring after grain is tillered and at least 8 to 10 tall and when weeds are approaching bud stage but do not spray when grain is in boot to dough stage (Zadoks 4 ₀ to 8 ₃)
---------------------------	---------------	--

* The higher rate may cause grain injury

** The 1 5/8 pint rate can produce injury to wheat Use good judgment to determine the severity of weed

problem against the possibility of crop damage When weeds are scattered spot treatment will lessen damage

RESTRICTIONS AND LIMITATIONS FOR SMALL GRAINS

Do not forage or graze meat animals on treated areas within 7 days of slaughter Do not apply more than 1 5/8 pints (3/4 lb ae) MCPA AMINE per acre per year

ESTABLISHED ALFALFA

WEEDS	Amount of MCPA AMINE Per Acre	DIRECTIONS
Yellow rocket pennycress (fanweed) and other weeds	1 pint	Apply in late fall following frost or in early spring when crop is dormant The temperature at the time of spraying should be above 40 ° F

RESTRICTIONS AND LIMITATIONS FOR ALFALFA

Do not forage or graze treated areas for 7 days after treatment

Do not apply more than 1 pint (1/2 lb ae) per acre per year

SEEDLING CLOVER ALONE OR UNDERSEEDED WITH GRAIN AND ESTABLISHED STANDS OF ARROWLEAF, CRIMSON, RED, LADINO, AND WHITE CLOVER (EXCEPT DUTCH)

WEEDS	Amount of MCPA AMINE Per Acre	DIRECTIONS
Seedling clovers (except Dutch)	½ pint	Treat seedling stands after they have 2 or more true leaves (trifoliate stage)
Established stands	¾ to 1 pint	Apply in late fall after frost or early spring when weeds are small Temperature at spraying should be above 40° F

FOR USE IN THE PACIFIC NORTHWEST ONLY Do not apply to sweet clover Observe drift precautions Stem
twisting will show up for a short time after application Some growth reduction may occur

RESTRICTIONS AND LIMITATIONS FOR CLOVERS

Do not forage or graze treated areas for 7 days after treatment

Do not apply more than 1 pint (1/2 lb ae) per acre per year

PASTURES, RANGELAND, CONSERVATION RESERVE PROGRAMS AND SET-ASIDE ACRES

WEEDS	Amount of MCPA AMINE Per Acre	DIRECTIONS
Newly seeded clover and grass pastures	½ pint	Treat seedling stands after they have 2 or more true leaves (trifoliate stage)
Established pastures Annual biennial and perennial weeds	1 to 3¼ pints*	Apply when weeds are small and growing Spray in spring and fall Spray perennial in early bud to full bloom and regrowth in fall Use higher rate for hoary cress (white top) Canada thistle buttercup and other hard to control weeds
Whitebrush	3 pints*	Apply in 1 gallon of diesel oil and 6 to 10 gallons of water per acre by aircraft Apply in spring or fall when foliage is fully developed and growing Spray during bloom but not after blossom shed Retreatment may be necessary NOTE Add MCPA AMINE to the water then add the oil while agitating Continue to agitate while spraying

* Do not spray legumes if present unless injury can be tolerated

RESTRICTIONS AND LIMITATIONS FOR PASTURES RANGELAND Do not forage or graze treated areas for 7
days after treatment

CONSERVATION RESERVE PROGRAMS AND SET-ASIDE ACRES Do not forage or graze at any time

**RESTRICTIONS AND LIMITATIONS FOR PASTURES RANGELAND CONSERVATION RESERVE PROGRAMS AND
SET ASIDE ACRES** Do not apply more than 3¼ pints (1½ lbs ae) MCPA AMINE per acre per year Do not apply

more than 2 applications per year with a minimum retreatment interval of 21 days

FALLOW LAND AND CROP STUBBLE

WEEDS	Amount of MCPA AMINE Per Acre	DIRECTIONS
Canada thistle hoary cress(white top) field bindweed and Texas blueweed	6 pints	Apply when weeds are young and continue treatment for 2 to 3 years for the best results DO NOT plant any crops for 3 months after treatment

NON-CROP AREAS - Airfields, Drainage Ditches Fence rows Roadsides Railroad Highway and Utility Rights-of-Way and other Non-Crop Areas

WEEDS	Amount of MCPA AMINE Per Acre	DIRECTIONS
Canada thistle meadow buttercup hoary cress (white top) and other hard- to-control weeds	3 ¼ pints	Apply in a minimum of 2 gallons of water per acre for aerial application and 20 to 100 gallons of water for ground application Spray the weeds thoroughly when they are in bud to early bloom and again during fall
Spot treatment	1/4 pint	Apply in 3 to 4 gallons of water

RESTRICTIONS AND LIMITATIONS FOR NON CROP AREAS - Do not forage or graze treated areas for 7 days after treatment Broadcast Treatment Do not apply more than 3 ¼ pints (1½ lbs ae) MCPA AMINE per acre per year Do not apply more than 2 applications per year Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days Spot Treatment Do not apply more than 6 1/2 pints (3 lbs ae) MCPA Amine per acre per year

GRASSES GROWN FOR SEED - Do not use on alfalfa clover other legumes or newly seeded areas

WEEDS	Amount of MCPA AMINE Per Acre	DIRECTIONS
Annual biennial and perennial weeds	1 to 2 pints*	Apply to established grasses before the head comes into boot Apply to seedling grasses after tillering Use the higher rate for heavier weed stands

* Legumes present may be injured or killed Bent Buffalo Carpet and St Augustine grasses may be injured by this treatment NOTE Repeat treatment may be needed

RESTRICTIONS AND LIMITATIONS FOR SEED GRASSES Do not forage or graze treated areas for 7 days after treatment Do not apply more than 3 ¼ pints (1½ lbs ae) MCPA AMINE per acre per year Do not apply more than 2 applications per year with a minimum retreatment interval of 21 days

FLAX

WEEDS	Amount Per Acre	DIRECTIONS
Annual and biennial weeds	1/3 to ½ pint	Apply when flax is 2 to 8 inches tall Do not spray once flax has reached the bud stage Use at least 8 to 10 gallons of water per acre for ground application and at least 3 to 5 gallons of water per acre for aerial application

RESTRICTIONS AND LIMITATIONS FOR USE ON FLAX – Do not allow livestock animals to forage or graze treated areas within 7 days of slaughter Do not apply more than ½ pint (1/4 lb ae) MCPA AMINE per acre per year

PEAS

WEEDS	Amount Per Acre	DIRECTIONS
Annual and biennial weeds	½ to ¾ pint	Use only in the Pacific Northwest Treat when peas are 4 to 6 inches tall Do not spray while peas are in blossom Peas may show slight injury but they usually recover a few days after treatment Use the higher specified rate before buds form on Canada thistle to prevent from going to seed Do not spray peas that are stressed from lack of moisture or when temperatures are over 90° F

		Apply in 15 to 30 gallons of water per acre for ground applications and 5 gallons of water per acre for aerial application
RESTRICTIONS AND LIMITATIONS FOR USE ON PEAS – Do not allow livestock to forage or graze treated pea fields Do not feed treated vines to livestock Do not treat bean-type peas such as crowder blackeye etc Do not apply more than ¼ pint (3/8 lb ae) per acre per year		

STORAGE AND DISPOSAL

Do not contaminate water food or feed by storage or disposal

PESTICIDE STORAGE Store in a secure area in original container only Do not store near feed or foodstuffs

PESTICIDE DISPOSAL Pesticide wastes are acutely hazardous Improper disposal of excess pesticide spray mixture or rinsate is a violation of Federal Law If these wastes cannot be disposed of according to label instructions contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance

CONTAINER DISPOSAL Use label language appropriate for container size and type

Nonrefillable containers Do not reuse or refill this container Clean container promptly after emptying

Nonrefillable container equal to or less than 5 gallons Triple rinse as follows Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip Fill the container ¼ full with water and recap Shake for 10 seconds Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal Drain for 10 seconds after the flow begins to drip Repeat this procedure two more times Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities such as burning of plastic containers If burned stay out of smoke

Nonrefillable container greater than 5 gallons Triple rinse as follows Empty the remaining contents into application equipment or a mix tank Fill the container ¼ full with water Replace and tighten closures Tip container on its side and roll it back and forth ensuring at least one complete revolution for 30 seconds Stand the container on its end and tip it back and forth several times Turn the container over onto its other end and tip it back and forth several times Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal Repeat this procedure two more times Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities such as burning of plastic containers If burned stay out of smoke

Refillable container Refill this container with pesticide only Do not reuse this container for any other purpose Cleaning the container before final disposal is the responsibility of the person disposing of the container Cleaning before refilling is the responsibility of the refiller To clean the container before final disposal empty the remaining contents from this container into application equipment or mix tank Fill the container about 10 percent full with water Agitate vigorously or recirculate water with the pump for 2 minutes Pour or pump rinsate into application equipment or rinsate collection system Repeat this rinsing procedure two more times Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities such as burning of plastic containers If burned stay out of smoke

WARRANTY DISCLAIMER

The directions for use of this product must be followed carefully TO THE EXTENT CONSISTENT WITH APPLICABLE LAW (1) THE GOODS DELIVERED TO YOU ARE FURNISHED AS IS BY MANUFACTURER OR SELLER AND (2) MANUFACTURER AND SELLER MAKE NO WARRANTIES GUARANTEES OR REPRESENTATIONS OF ANY KIND TO BUYER OR USER EITHER EXPRESS OR IMPLIED OR BY USAGE OF TRADE STATUTORY OR OTHERWISE WITH REGARD TO THE PRODUCT SOLD INCLUDING BUT NOT LIMITED TO MERCHANTABILITY FITNESS FOR A PARTICULAR PURPOSE USE OR ELIGIBILITY OF THE PRODUCT FOR ANY PARTICULAR TRADE USAGE UNINTENDED CONSEQUENCES INCLUDING BUT NOT LIMITED TO INEFFECTIVENESS MAY RESULT BECAUSE OF SUCH FACTORS AS THE PRESENCE OR ABSENCE OF OTHER MATERIALS USED IN COMBINATION WITH THE GOODS OR THE MANNER OF USE OR APPLICATION INCLUDING WEATHER ALL OF WHICH ARE BEYOND THE CONTROL OF MANUFACTURER OR SELLER AND ASSUMED BY BUYER OR USER THIS WRITING CONTAINS ALL OF THE REPRESENTATIONS AND AGREEMENTS BETWEEN BUYER MANUFACTURER AND SELLER AND NO PERSON OR AGENT OF MANUFACTURER OR SELLER HAS ANY AUTHORITY TO MAKE ANY REPRESENTATION OR WARRANTY OR AGREEMENT RELATING IN ANY WAY TO THESE GOODS
